

The Automated Forms Server for Dynamics GP

Key Features

- **Automatically e-mail, Fax, Print, and Archive EFT Notifications**
- Route forms to any e-mail address, fax number, or printer based on variable data within the form.
- Automatically archive EFT notifications by vendor
- Easy to install and configure - Messenger automatically detects the current version, installed modules, company datasets, and location of the Dynamics GP data files. It's simple and intuitive.
- Messenger is 100% software driven. So deployment and maintenance is simple, inexpensive and portable.
- Utilize the built-in WYSIWYG form design tool. Create new, industry specific, or unique forms for certain vendors and generate them during standard forms printing.
- Print to any printer on the network, including remote printers via Citrix, WANs, or TCP/IP by form and/or by ply.
- Easily add additional Dynamics GP information onto your EFTnotice.

Automatically e-mail or fax...

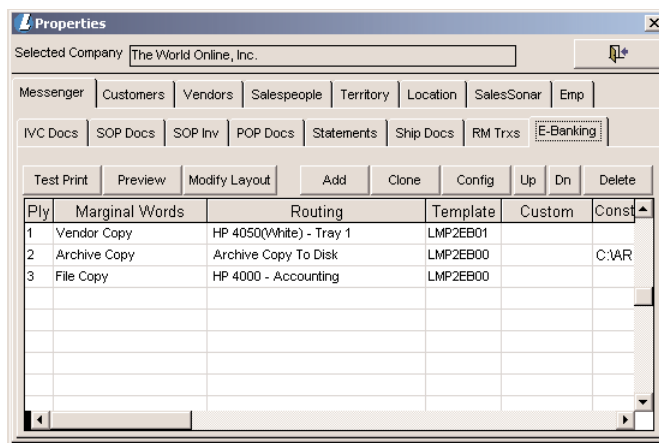

- **EFT transmission notices** once they have been processed in Dynamics GP.

Eliminate...

- Manual print procedures if unattended processing is turned on.
- Manual faxing
- Manual emailing
- Folding, stuffing, sealing envelopes and postage! Messenger for EFT can cut these costs by \$ 0.50-0.80 per notice sent.

Microsoft Dynamics GP

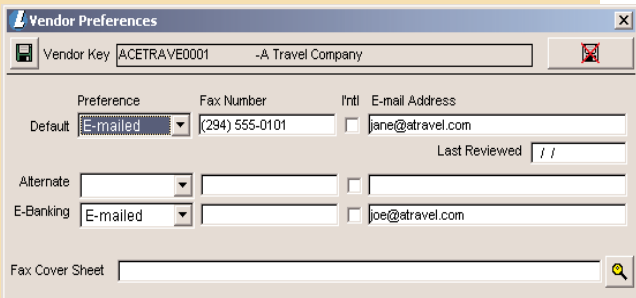

Configure your business form rules by ply for each form and let Messenger do the rest!

Liaison Messenger EFT is a Forms Automation Server that adds true workflow, routing, faxing, e-mailing and archiving of your EFT notifications with no additional hardware or user intervention.

Automatically process EFT notifications by request or on a scheduled basis for unattended processing. Messenger EFT stores the vendor's preference for receiving their notification and once their electronic funds transfer has taken place in Dynamics GP delivers the notice to the Vendor, eliminating all manual faxing and emailing.

ISV/Software Solutions
Microsoft Business Solutions

Set Vendor preferences individually allowing you to transmit each EFT notice independently from the next - printed, faxed, and/or e-mailed automatically!

System Requirements:

- Microsoft Dynamics
- Dynamics GP, EFT for Payables module required
- Emailing requires one license of Outlook
- Faxing requires (one) of the following:
 - Microsoft fax transport (built into Windows)
 - Right Fax, Zetafax or any server based fax solution that utilizes Outlook
 - Internet based faxing service
