Electronic Document Delivery
Automated email and faxing
EFT-AP Vendor Notification
Incremental cost savings

Don't caught looking with standard document distribution...

Tired of manually sending EFT Payment Notices?

Liaison Messenger® EFT is a forms automation server that adds true workflow, routing, emailing, faxing, and archiving of EFT REMITTANCES with no additional hardware or user intervention.

Liaison Messenger EFT-AP stores the vendor's preference for receiving their EFT remittance. Once the electronic funds transfer has processed, print the remittance with Liaison Messenger EDD virtual printer driver for automated distribution of EFT remittances via email and/or fax.

Automate distribution with Liaison Messenger EFT-AP

Just print with the Liaison Messenger EDD **virtual printer** driver using your normal procedures. Liaison Messenger EFT stores distribution preferences (email, fax, or print) by vendor as well as storing recipient preferences by document type, if applicable.

Liaison Messenger EFT's auto-archiving provides the ability to easily reprint and retrieve previously distributed vendor notices at any time.

Eliminate the following

- Manual emailing and faxing
- Labor associated with folding, stuffing, sealing envelopes
- Envelopes, forms and postage cutting costs .50 -.80 per notice

If you wish to upgrade Liaison Messenger EFT-AP to the full Liaison Messenger EDD product at a later date, installation is a 30 process as we use your existing setup.
