ELECTRONIC DOCUMENT DELIVERY

TECHNOLOGY at work for you

Liaison Messenger EDD is the ultimate workflow automation server and scripting tool. It allows you to create rich and powerful automation processes for any company, any department, running any system.

A unique blend of Electronic Document Delivery, workflow automation, document assembly and fulfillment, document conversion, all in one robust system.

Integrate Crystal Reports, SSRS Reports, SQL stored procedures, and Microsoft Office documents with your standard system reports, business forms, and company processes to mimic the way your organization operates.

Let Liaison Messenger EDD make *technology* do the work.

AUTOMATION at work for you

Liaison Messenger EDD uses your **existing** business form and report templates. Assign unique rules for distribution and delivery of each report and document to match your manual process. These rules are then called and executed at the time you print the documents.

Training is easy. All of your current printing procedures for your business forms and reports remain the same. You just select the Liaison Messenger EDD virtual printer driver. All of the emailing, faxing, printing, archiving, routing takes place at the Liaison Messenger EDD Server.

Start *automating* forms today with Liaison Messenger EDD.

- Invoices
- Order Confirmations
- Quotations
- Purchase Orders
- Advanced Ship Notices
- Open Order Reports
- Packing Slips
- Pick Tickets
- EFT-AP Remittances
- EFT-AR Remittances
- Direct Deposit Statements
- GL & Accounting Reports

If you can print it, give us a call at (800) 811-4618

EASE OF USE

Liaison Messenger EDD is practically invisible to the end user. You print your business forms and reports like you currently do. The only change is selecting the Liaison Messenger EDD *Virtual Printer driver*.

AUTOMATED ROUTING RULES

Liaison Messenger EDD also provides you the ability to assign specific business rules to forms, customers, vendors, and employees. Recognize data and content on the form or report to automatically perform additional functions like attaching documents, calling other reports, even triggering stored SQL procedures.

ATTACH SUPPORTING DOCUMENTS

Attach additional documents automatically. These attachments can be either static, (i.e. newsletters, updated price lists) or variable based on data within the document. Invoices to Statements, P.O.s to Sales Orders, Billing Details to Summary Invoices. MSDS, instruction sheets. You define the document assembly rules.

WORKFLOW at work for you

Liaison Messenger EDD provides the ability to configure unique rules that are associated with each form. From the single function of selecting a print job, Liaison Messenger EDD can simultaneously perform multiple tasks like the following example.

Send batches of forms by recipient's preferences (email, fax, print, etc). Print hard copies in accounting and remote printers in the warehouse. Email or fax copies to the respective salespeople, archive copies to disk as individual PDFs, maybe cc: the controller if an AR Statement is over a set dollar amount. All at the same time!

MESSENGER EDD at work for Damar Security Systems

"Liaison Messenger EDD is very flexible and has worked great for us. We use Messenger EDD for distributing over 50 Crystal and SSRS reports. Messenger EDD allows us to schedule running stored procedures which then uses the data gathered to pass off as arguments to the related reports that are run and distributed. Reports are parsed into individual PDF's that are sorted, e-mailed and saved by Dealer.

We also use Messenger EDD for the distribution of Invoices & Work orders. Work Orders are e-mailed to the technician and archived. Invoices are distributed to each Customer's preference. They now receive multiple Invoices combined into 1 PDF versus individual e-mails for each Invoice..... Work Order's are merged with the applicable Invoice, e-mailed to the customer and archived by customer.

Technical Support has also been fantastic. I always receive an answer to my questions within 1-2 hours, if not immediately. Couldn't ask for better support."

Joanne Millman
Damar Security Systems

If you can print it, give us a call at (800) 811-4618

As you can see, Liaison Messenger EDD is different, innovative, and was developed to specifically address your unique business needs.

From accounting to manufacturing, sales to human resources, workflow automation can benefit everyone.

Installation and setup is a snap. Since Liaison Messenger EDD uses your existing reports and forms, it is ready to run in about two hours. The end-user training is as simple as selecting the Liaison Messenger EDD *virtual printer driver*.

We invite you to contact Liaison Software Corporation and tell us your document processing and delivery problems. We will show you in 15 minutes, how Liaison Messenger EDD can also cut costs and improve cash flow.
